SUPERVISORY PATENT EXAMINER

REASONS FOR ALLOWANCE

The closest prior art, Czernecki et al (J. Org. Chem. 1991, 56, 6289-6292) teaches a process wherein the coupling of the lithiated aromatic moiety to the carbonyl compound is carried out at -78°C. The instant process is drawn to performing both the lithiation and the coupling steps at temperatures above -20°C. According to the Declaration the process as instantly performed results in a substantially higher yield of the desired product. Hence, the process as instantly claimed is neither taught or fairly suggested by the prior art of record.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Burton Rodney on September 7, 2006.

In the Amendments to the Claims of 8/31/2006:

Claim 21 has been cancelled.
